

*Feedback from students after a SmartLearning Lesson (Grade 5)*

- "I noticed that it was way easier to learn this way and my ideas seem to stick in my head better." *(A boy with poor fine motor skills, one who struggles to write down anything on paper)*
- "I felt more confident to stand up and say what I am thinking because everyone was doing it." *(A very quiet girl, ESL, rarely puts her hand up)*
- "I really liked talking with my partner because I get to learn new information about what my partner is thinking, plus I have my own thoughts, so it is like I am learning double the information. I really appreciated what my partner had to say and I added it to my own thoughts. Then when I heard others sharing, I was learning even more than ever." *(A boy with above average achievement)*
- "I felt safer to share out loud because I could read the frames off the board and fill in the blanks." *(Very shy and very quiet girl)*
- "I just love this class so much Mrs. B, I just love it." *(A quiet boy with poor written output skills, experiencing his first year at public school; was home schooled. I think he felt inspired by our Smart Learning session today and kind of proud of himself for being so involved.)*
